

# ARCTIC ROOTS Alaska Cider

The perfect balance of bright acidity and subtle sweetness, Alaska Cider overflows with fresh apple flavor. Each batch is fermented in part with juice from over 100 varieties of Alaska-grown apples we painstakingly picked, and pressed ourselves to showcase the terroir of Alaska.

## Our Story

Generations ago in the harsh hinterlands of Interior Alaska, intrepid Alaskans planted vast apple orchards. Those apples, grown just south of the Arctic Circle, are now part of every handcrafted batch of Arctic Roots Cider.
